

StarMesh Technologies LLC and Pulse, Inc. Sign Reseller Partnership Agreement to Market, Sell, and Deliver Wireless IP Equipment

StarMesh Gains Access to Pulse's Lucrative Sales Channels of WiFi Hotspot Operators, Wireless ISPs and Municipalities Building Metropolitan WiFi High-Speed Internet Access Networks

Alexandria, VA - September 5, 2006 – StarMesh Technologies, LLC (StarMesh) (www.starmeshtechnologies.com), a leading provider of wireless VoIP and wireless data products and services, has signed a nationwide reseller partnership agreement with Pulse, Inc. (www.pulsewan.com), a leading distributor of wireless, telecommunications, and data communications, to carry its cost-effective line of scalable Hopling Technologies, B.V. (Hopling) (www.hopling.com) mesh networking products in the United States.

StarMesh's mesh network solutions from Hopling include a full portfolio of indoor/outdoor access points, billing gateways, base stations and customer premises equipment and wireless mesh routing software that operates in the 2.4GHz, 2.5GHz, 2.6GHz, 3.5GHz, 4.9GHz and 5GHz frequency bands.

Hopling's products provide a very robust and scalable architecture that provides true mobility for wireless IP-based products and services such as voice, video and data for both licensed and unlicensed networks. The Hopling product line includes point-to-point, point-to-multipoint and fully meshed network solutions featuring:

- Superior next generation mesh-based solutions
- Dynamic self-healing wireless technology
- True mobile broadband connectivity with a multitude of IP-enabled devices
- Enhanced security applications
- Rapid deployment
- Superior layer 2 "mesh routing" algorithms
- Ability to serve large-scale environments with dense populations
- Low latency to support VoIP applications
- Dual radio delivery system

StarMesh's customer base includes Internet service providers, enterprise customers, carriers, local municipal governments, system integrators, resellers and other broadband wireless network developers that want to provide seamless metropolitan coverage through a series of indoor Wi-Fi hotspots, outdoor Wi-Fi Hotzones and very large metropolitan Wi-Fi mesh networks.

Hopling's wireless mesh networks support wireless high-speed Internet access, Wi-Fi mobile phones using wireless Voice over IP (VoIP), mobile IP services, and Video Verified Security services.

"We are very excited to leverage our marketing efforts with Pulse, Inc.'s extensive reseller network to further broaden the reach of our wireless IP products and services," said Robert Veltman, President of StarMesh Technologies. "Pulse, Inc.'s established base of wireless customers should be a great fit for our wireless VoIP and mobile IP products and services."

"Pulse's focus and expertise in selling wireless solutions supports our go to market strategy for reaching enterprise and service provider customers through strategic wireless resellers and integrators in the United States," Veltman continued.

“The Hopling product line offers unique features and benefits that will be a great addition to our wireless portfolio,” said Pulse President, Salvatore Costantino. “The solution provides distinct services such as wireless voice over IP and a much needed solution for high-speed wireless mesh broadband connectivity that is priced much better than what we have seen from other vendors such as Tropos Networks or Strix Systems.”

StarMesh is the exclusive distributor of Hopling Technologies, B.V. equipment in the Americas. StarMesh has signed reseller agreements for Canada and the United States, but is actively seeking wireless resellers in South America to carry the Hopling product lines. Interested resellers should contact Robert Veltman at (866) 380-3020.

About StarMesh Technologies, LLC

StarMesh is a leading provider of private and public access points, billing gateways and mesh network routers and nodes, plus the embedded software applications that automatically creates large scale intelligent networks that deliver transparent, secure, high-speed Internet access to the mobile user over public and licensed spectrum, including 2.4GHz, 2.5GHz, 2.6GHz, 3.5GHz, 4.9GHz and 5GHz frequency bands. StarMesh has offices in Las Vegas, Nevada and Alexandria, Virginia. The Company can be reached at (866) 380-3020 or via the Company’s website at www.starmeshtechnologies.com.

About Pulse, Inc.

Pulse is a value-added distributor providing Wi-Fi, Broadband, Voice over IP (VoIP), Virtual Private Networks (VPNs) and other wireless networking related products and services to resellers and partners throughout North America and Europe. Pulse has established a reputation as a leader in distributing wireless networking, with highly qualified sales, engineering and technical support personnel focused on these solutions. All enterprise customers, carriers, ISPs, and municipalities are encouraged to contact Pulse to learn more about Hopling Technologies, B.V. wireless IP access and mesh networking equipment. Pulse performs network design, installation and equipment acquisition. For more information call (888) 785-7393 or visit the Company’s website at <http://www.pulsewan.com>.
